MISSIONS

Mission 3030-03: Drop It Like It's Hot
Carbonis, Duchy of Orloff, Free Worlds League
May 23, 3030
Pilot Skill: 2-4

Okay boys, listen up! Thanks to the legwork done by the Blades of Death, we've been able to track the remnants of those pirates you cleaned up back at the digsite. They've been hard at work trying to get that 'unopenable' case of keycards they found in the SLDF convoy wreck to yield its reward, and have set up in a base only a few clicks away. Normally, the dropship could put you down nearby for you to approach on foot, but from what we can see from the ship's sensors, the pirates have taken a 'defense in depth' approach, and set up a well guarded perimeter.

Fortunately for us though, Scotty spotted something irregular. I didn't catch much of the technical details, but according to him there's no way the AA turrets they have actually work. Plus, their perimeter is wide, which means you'll have plenty of room to maneuver once we're past it.

If you haven't guessed what's about to happen, then you're in for a treat. We're going to have to take Scotty's word on the AA, and that means you'll be hot dropping right into the middle of the pirate base. For those of you without jump jets, we've got some left over disposable packs from when the Dragoons pulled the same trick on us back in Barlow's End. Scotty's hooking them up now, so get ready.

If we're going to make it into Fort Dunedin, we're going to need those keycards. The pirates are probably hiding them in one of the warehouses, so go in, smash up the place, and get out. They won't make it easy, but if you made short work of them the last time, I'm sure you'll do great. Oh, and one more thing. It looks like the Blades of Death were right about something else. They do indeed have an Atlas, but it's not a normal variant. I haven't the slightest clue where they found this, but it's equipped with 5 SRM 6's, so be careful.

We're almost there, so suit up and get ready.

Map: Deserts map pack "AeroBase #1", "AeroBase #2", "Desert Runway", "Oasis"

Recommended Maps:

- 1: 2019 Desert AeroBase 1
- 2: 2019 Desert AeroBase 2
- 3: 2019 Desert Runway
- 4: 2019 Desert Oasis

Setup: The Players are hot dropping in the middle of the pirate base originating at hex 0109 on "AeroBase #2". The pirates set up in AeroBase #1.

Special Rules

Watch that first step! The players enter the battle via combat drop (See Strategic Operations, pg. 22). Each player may choose to begin the battle at altitude 1 (landing on turn one) or altitude 4 (landing on turn 2). Player battlemechs that scatter off the map are not considered destroyed. Instead, resolve the falling damage to the scattered unit, and set it aside. The player must spend one turn off the board recovering from the fall, and may re-enter the battlefield on the next turn through the same hex they left from. (If that hex is impassable, select the closest available alternative).

Watch that first step! (The Simplified version): If Strategic Ops isn't available, or you have less experienced players, use the following system: Players may choose to enter the map on turn 1 or turn 2. When they enter the map (in initiative order), they place their mini on any hex on the board. That first turn they are "Visible" but cannot be shot at nor can they shoot. The following turn they may move up to their walk speed in any direction as if they jumped. They will have a movement modifier as if they had jumped, but will gain no heat for that movement.

Six Hat Shuffle: The location of the mcguffin is picked by the gm. Then the players can check a hanger by entering the main doors (the indent in the building) on a walk or run using one extra point of movement. You can enter from any adjacent hex using one extra point of movement if you use a charge of the 3030-02 cert. While inside the building the mech cannot be targeted or make attacks. At the beginning of the next turn that hanger will be revealed if it has the mcguffin. The turn after a mech enters the hanger it must leave the hanger though the front entrance, if the entrance is completely obstructed by enemy units then the mech inside the building may bypass one single enemy at one extra movement point. (You may use one charge of the cert from 06-02 to blow open a wall and exit to any hex adjacent to the building, but at the beginning of the next round, the building collapses into rubble)

I GOT IT!...now what?: If the building has the mcguffin then the pilot of the mech picks an arm to hold the mcguffin. The mcguffin can be exchanged between mechs by ending their turn next to each other and not make any physical attacks. The mcguffin is dropped if the mech loses the indicated arm or any actuator is damaged. If the mech is prone then the key card can be picked up by any mech in an adjacent space. If both sides try to pick up the key,

the key goes to the side with the most mechs adjacent to the mcguffin. If there is a tie then the key goes to the side that had has the most functioning actuators. If a mech is destroyed or the key is dropped then the key can be picked up by the mech that ends its turn in that space or any adjacent space.

Mission Objectives: Find the hanger that has the access cards and have control of them at the end of the session.

Award (C-Bills)	Mech Survived	Mech Severely Damaged	Mech Destroyed
Control the access cards at the end of the session	350,000	250,000	100,000
Get the access cards off the bottom or side edges of the map and/or Kill the atlas pilot. (Can complete both for double reward)	+100,000	+100,000	+100,000
The access cards are not recovered, left on the ground or an enemy mech steals them back.	150,000	100,000	50,000

Award (XP)	Pilot Survived	Pilot Killed
Control the access cards at the end of the session	15	5
The access cards are not recovered, left on the ground or an enemy mech steals them back.	8	3
Opposing 'Mech/Combat Vehicle destroyed by party (each)	+1	+1

Additional Rewards

I Know a guy: Cross off this cert to purchase any 'mech off of the Free World's League 'mech list that can be used by any Pilot in your stable. Alternatively: Any you may cross this cert off to give a FWL pilot permanent access to any 'mech in your stable that he would not normally have access to - such as a faction 'mech for any other faction.

BATTLETECH™

MISSIONS

Mission: 3030-03 Debrief
Drop It Like It's Hot
Carbonis, Duchy of Orloff, Free Worlds League
May 23, 3030

With no more sign of the pirates behind you, you breathe a sigh of relief and stretch your arm. You've never had to so carefully manage your arm actuators, and your carpels are aching. Bringing your mech's arm around to right below the cockpit, you engage the motion locks and flip the release for your windshield. You expect a wash of desert heat, but the weather is strangely comfortable as you step out onto your mech's oversized arm, a hand on your cockpit to steady you. Looking out over the horizon, you watch as your fellow mechwarriors begin to coalesce around you as the sun sets behind them.

A glance down confirms that the keycards are safe, somehow making it through all of this. You reach down to pick them up and give a surely hard to spot thumbs up to the rest of your lancemates. With one last deep breath, you step back into your cockpit and place the keycards down next to your seat. After closing everything up and re-engaging your mech, you radio in confirmation before setting off towards the rendezvous point. The pirates' defenses should be easy to navigate through now that you're coming from the other side, and you doubt there are any more of them hidden in the dunes.

After shifting up the KPH of your speed, you recline back and watch as the rises and dips of the sand blend into each other. The open comms between your lancemates is filled with excited chatter and wishful musing. While you keep mostly quiet, you can't help but glance over to the keycard case next to your seat. After an exhale and a shrug you reach over and pick it up, laying it on your lap while you check to make sure you didn't knock anything on your dashboard. The pirates somehow got through whatever encryption was protecting that case, and you only have to undo a couple of clasps to see what's inside. Whatever you thought this would be, this isn't it. Inside the case is a solid metal rectangle. It's shiny as all hell, and you're left to see your own reflection even inside of your cockpit. You close the case and shake your head, you're sure Scotty will have the time of his life with this when you get back to the drop ship.

After a not so distant journey, you and the rest of the lance reach the extraction point. It's nighttime by now and you're left unaccosted as you load up into the dropship. After a clean entry, and a quick shower, it's off to the debrief, which is being held in the mess hall tonight. Everyone's tired, and fried chicken is being served for dinner, which means no one's leaving anytime soon.

There's no better sound than happy mechwarriors after a successful mission, but Sarge interrupts the cheery conversation and the crunching of food to finish business for the night.

"Okay boys, listen up! Good haul on the keycard tonight. If you've noticed Scotty's absence, it's because he's a little busy with his new toy." After a little chuckle from the room, he continues.

"The Capellans are more than pleased with the progress we've made. They're still hurting

after what the Feds did to them, so they're looking forward to our next update. Luckily for us, we're not too far off from that. The keycard isn't just a door opener, it's also a map. According to the preliminary data on it, there's a mountain range not too far from here that supposedly contains Fort Dunedin. The weather has always been strange around the area, which would explain why no one's ever found it. It's not all mountains up there apparently, so we're going to be heading up to check it out."

"Now for the bad news. While we've got a keycard, there were more than the one that we just took. I was hoping all of them were in that case, but I guess not. That means there's more floating around there. On top of that, Scotty doesn't think those guys you just fought are pirates at all. I mean, an Atlas AS7-A isn't something you just stumble into. Unfortunately, we've got no one to confirm that theory with, but it does mean I'm expecting trouble when we get to the next mission."

"That, though, is a problem to be solved later. You were all great today, enjoy your well earned meal and get some sleep." With that, Sarge pats the nearest mechwarrior on the back and stands up, leaving the rest of you to the meal. Normally, all this talk of keycards, SLDF forts, and strange pirates would have you up all night, but after a day like today, you know you'll sleep like a baby.

BATTLETECH™

MISSIONS

Mission: 3030-03 Debrief
Drop It Like It's Hot
Carbonis, Duchy of Orloff, Free Worlds League
May 23, 3030

With no more sign of the pirates behind you, you breathe a sigh of relief and stretch your arm. You've never had to so carefully manage your arm actuators, and your carpels are aching. Bringing your mech's arm around to right below the cockpit, you engage the motion locks and flip the release for your windshield. You expect a wash of desert heat, but the weather is strangely comfortable as you step out onto your mech's oversized arm, a hand on your cockpit to steady you. Looking out over the horizon, you watch as your fellow mechwarriors begin to coalesce around you as the sun sets behind them.

A glance down confirms that the keycards are safe, somehow making it through all of this. You reach down to pick them up and give a surely hard to spot thumbs up to the rest of your lancemates. With one last deep breath, you step back into your cockpit and place the keycards down next to your seat. After closing everything up and re-engaging your mech, you radio in confirmation before setting off towards the rendezvous point. The pirates' defenses should be easy to navigate through now that you're coming from the other side, and you doubt there are any more of them hidden in the dunes.

After shifting up the KPH of your speed, you recline back and watch as the rises and dips of the sand blend into each other. The open comms between your lancemates is filled with excited chatter and wishful musing. While you keep mostly quiet, you can't help but glance over to the keycard case next to your seat. After an exhale and a shrug you reach over and pick it up, laying it on your lap while you check to make sure you didn't knock anything on your dashboard. The pirates somehow got through whatever encryption was protecting that case, and you only have to undo a couple of clasps to see what's inside. Whatever you thought this would be, this isn't it. Inside the case is a solid metal rectangle. It's shiny as all hell, and you're left to see your own reflection even inside of your cockpit. You close the case and shake your head, you're sure Scotty will have the time of his life with this when you get back to the drop ship.

After a not so distant journey, you and the rest of the lance reach the extraction point. It's nighttime by now and you're left unaccosted as you load up into the dropship. After a clean entry, and a quick shower, it's off to the debrief, which is being held in the mess hall tonight. Everyone's tired, and fried chicken is being served for dinner, which means no one's leaving anytime soon.

There's no better sound than happy mechwarriors after a successful mission, but Sarge interrupts the cheery conversation and the crunching of food to finish business for the night.

"Okay boys, listen up! Good haul on the keycard tonight. If you've noticed Scotty's absence, it's because he's a little busy with his new toy." After a little chuckle from the room, he continues.

"The Capellans are more than pleased with the progress we've made. They're still hurting

after what the Feds did to them, so they're looking forward to our next update. Luckily for us, we're not too far off from that. The keycard isn't just a door opener, it's also a map. According to the preliminary data on it, there's a mountain range not too far from here that supposedly contains Fort Dunedin. The weather has always been strange around the area, which would explain why no one's ever found it. It's not all mountains up there apparently, so we're going to be heading up to check it out."

"Now for the bad news. While we've got a keycard, there were more than the one that we just took. I was hoping all of them were in that case, but I guess not. That means there's more floating around there. On top of that, Scotty doesn't think those guys you just fought are pirates at all. I mean, an Atlas AS7-A isn't something you just stumble into. Unfortunately, we've got no one to confirm that theory with, but it does mean I'm expecting trouble when we get to the next mission."

"That, though, is a problem to be solved later. You were all great today, enjoy your well earned meal and get some sleep." With that, Sarge pats the nearest mechwarrior on the back and stands up, leaving the rest of you to the meal. Normally, all this talk of keycards, SLDF forts, and strange pirates would have you up all night, but after a day like today, you know you'll sleep like a baby.
